1.

Editors Note: Five Percent of GDP is \$750 Billion Dollars, Much More than We Spend on Defense and less than less than Obama Care.

Companies increased the share paid by employees

Company Health Care Family Cost Analysis

Year	Ins. Cost	Employee	Company Cost
2010	13,710	3,997	9,713
1999	5,791	1,543	4,248

Company can raise price, lower profit, cut cost by forgoing raises or freeze payrolls to save \$5,465.

Editors Note: For middle income occupations, \$5465 is 10 to percent of there hourly pay. This is such a large portion that much can be gained by trying to decrease the number employed.

Company Stopped Hiring Middle Income Workers

Higher Benefit Cost Means Less Hiring, Fewer Insured.

Obamacare Reverses a Fifteen Year Trend!

A total of 46.3 million people in the US do not have health coverage, a trend that has been rising in the past 15 years, a US survey published Tuesday said (June 19, 2012). There was good news for children in the data from the 2011 National Health Interview Survey, which showed that seven percent of US youths were uninsured last year at the time of the interview, compared to 13.9 percent in 1997. But for adults aged 18-64, it was a different story. For that group, lack of health insurance coverage was 21.3 percent in 2011, making up 40.7 million people, according to the data from the Centers for Disease Control and Prevention.

There are five broad categories of waste in health care: providing services that are unlikely to improve health, using inefficient methods to deliver useful services, charging noncompetitive prices for services and products, inducing or incurring excess administrative costs in the health care and health insurance sectors, and missing opportunities to lower net spending via illness and injury prevention. Health insurance is now primarily provided by the government in the public sector, with 60-65% of healthcare provision and spending coming from programs such as Medicare, Medicaid, TRICARE, the Children's Health Insurance Program, and the Veterans Health Administration.
